

Genius-ST The Hicom Announcer

2/3/4 channels with separate, user-recordable announcements,
full PBX control (start/stop)

GENIUS 220/ 330/ 440-ST

designed for:

Hicom 150E (TIEL)

Hicom 200 (TIEL)

Hicom 300 (TMOM)

Music-On-Hold included!

One channel can be used as an on-hold line. Music is loaded easily via the integrated CD-Player.

GENIUS-ST is a universal, digital announcer for many customer winning applications such as:

Automatic Attendant, greets callers automatically in a friendly way, helps avoid customer frustration and abandoned calls.

Music-On-Hold, entertains waiting customers, makes on-hold time appear shorter.

ACD-Messages, keep customers informed in a call-distribution environment (easy message updating via integrated handset).

GENIUS-ST highlights:

Multi channel operation

Individual messages recordable via the system's handset

Integrated CD-player for download of music or professionally recorded messages into memory

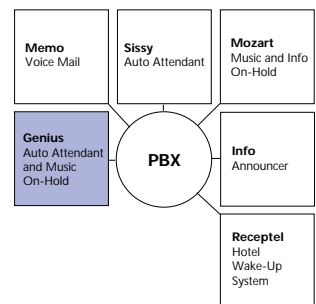

High-quality playback (64k bits/s digitization "like ISDN")

Wear-free operation, requires no maintenance

Flexible operating modes (endless loop or PBX-triggered start of announcement)

Companies and institutions of any size and in any industry can use GENIUS-ST to improve their telephone service

GENIUS-ST reduces abandoned calls, raises customer satisfaction and improves the company image

Versions

GENIUS 220-ST:
2 channels/announcements

GENIUS 330-ST:
3 channels/announcements

GENIUS 440-ST:
4 channels/announcements

(channel 1 is well-suited for
